FOR IMMEDIATE RELEASE

One2OneMate™ Introduces StudentMate™, First Linux Based, Low Cost, K-12 Specific One2One mobile computer for Education.

San Diego, California, NECC, July 5, 2006 One2OneMate™, a division of Alta Heights Technology Corporation, introduces StudentMate™, the first Linux based handheld laptop solution for education. The StudentMate is a low cost education specific, handheld laptop with a 7” color touch screen (6 1/2” wide by 3 1/2” tall) and full size QWERTY laptop keyboard.

StudentMate is designed to offer teachers and students the means for affordable, durable, and student specific technology that is adaptable to today's changing education environment. Simple to use and compatible with industry standard applications such as, MS Word and MS Excel, StudentMate offers students a portable computing hardware and software solution, allowing for learning to occur in all subject areas anytime and anywhere.

“One2OneMate is committed to offering education a true One2One laptop alternative that can be easily configured to meet any K-12 needs. The key philosophy behind our engineering efforts is to develop a technology that allows the purchase price to reflect only those utilities requested while still maintaining the ability to expand as needed” said Michael E. Spencer, President of One2OneMate.

Due to the scalability of StudentMate, schools and districts will benefit substantially by purchasing only those features they need. *“Traditional laptop computers are designed for the masses, and ship with features and distractions that cost money, reduce battery run time and durability. StudentMate was designed entirely with the student in mind”* said Ben Evered, VP Marketing & Sales.

Located in the heart of Silicon Valley, California, One2OneMate utilizes the latest in hardware and software technology in developing the StudentMate *“By using Linux as our Operating System, off the shelf components and a Linux based application platform, we have been able to pass significant cost savings on to our customers”* said Mike Dathe, Chief Technology Officer of One2OneMate.

StudentMate is made of durable plastic, has no moving internal parts and can fit in any backpack or briefcase. Each unit ships with our core software products including:

- **Word Processor** - A robust word processor that incorporates all the features and benefits of a standard word processor compatible with industry standard formats, including MS Word.
- **Spreadsheet** - A full featured Microsoft Excel-compatible spreadsheet application. Open, edit and create Excel 5.0, 95, 97, 2000, XP, Excel 2003, and Excel for Apple Macintosh formats.
- **Contact Manager** - Complete contact manager providing basic to advanced features for managing your contacts.
- **Clock/Calendar/Scheduler** - Complete scheduler to help students manage their time and workload.
- **Calculator** - Standard calculator offering addition, subtraction, multiplication and division capabilities.
- **Typing Tutor** - All The Right Type Lite Edition by Ingenuity Works comes preinstalled at no charge on every StudentMate. A full featured deluxe version is also available at a minimal cost.
- **Standards Based Formative Assessment** - AssessMate is a Standards-based online testing system that lets educators create tests either with their own questions or by using any of the FREE 1,000 preinstalled questions. Tests can be interactive (student moves objects around the screen to answer questions) and can be deployed via the StudentMate or online. Results are automatically transferred to the teacher's computer for analysis by individual student, demographics, instructional standards, or test items. Additional packets of 1,000 test items in core subject areas can be purchased for a one-time nominal fee. More than 30,000 items are available.
- **Home Work To Do** - A tool for students to list all their home work assignments and deadlines.
- **Student Summary List** - A program allowing the teacher to view all the activities the student has done on the StudentMate for any specified amount of time.
- **e-Message Client** – Instantly send and receive messages between the StudentMate and teachers PC.
- **PC Server Interface/S.A.M.** - The StudentMate Administration Module (“S.A.M.”) software allows for connection to the teacher's networked PC allowing for ease of sending and retrieving students work.
